DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to a method of constructing a modular computational model for predicting one or more therapeutic properties of a chemical compound via obtaining data describing the interaction between training compounds and interaction partners to construct a single module modular computational model, classified in class 703, subclass 11.
- II. Claims 18-28, drawn to a method of evaluating a plurality of test structures for one or more therapeutic properties via applying a modular computational, classified in class 702, subclass 19.

The inventions are distinct, each from the other because:

The inventions of Group I and Group II are related regarding the type of data directed to interactions that are utilized as well as in prediction of values therefrom, but are not disclosed as being capable of being used together and have different modes of operation and function. The inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the Group I invention constructs a single module modular computational model as described in the last 2 lines of claim 1, whereas the invention of Group II does not construct such a model, but rather utilizes a first modular computational model.

Art Unit: 1631

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
